PROFESSIONAL SUMMARY

Experienced Data Scientist with 7+ years of expertise in machine learning, statistical analysis, and data visualization. Proven track record of developing predictive models and delivering data-driven insights that optimize business performance and drive strategic decision-making across diverse industries.

PROFESSIONAL EXPERIENCE

Senior Data Scientist | DataFlow Analytics | Austin, TX | Jul 2021 - Present

- Lead data science initiatives for Fortune 500 clients, developing machine learning models that improved customer retention by 35% and reduced churn prediction accuracy to 94%.
- Built end-to-end ML pipelines using Python, TensorFlow, and scikit-learn, processing 10+ million data points daily and enabling real-time predictive analytics for business operations.
- Collaborated with cross-functional teams including product managers, engineers, and business stakeholders to translate complex analytical findings into actionable business recommendations and strategic initiatives.
- Mentored junior data scientists and established best practices for model deployment, version control, and performance monitoring using MLOps frameworks and cloud infrastructure.

Data Scientist | TechInsights Corporation | Dallas, TX | Jan 2019 - Jul 2021

- Developed sophisticated predictive models for financial services clients using advanced statistical techniques and machine learning algorithms, resulting in 25% improvement in fraud detection accuracy.
- Created comprehensive data visualization dashboards using Tableau and Power BI, enabling stakeholders to monitor KPIs and make data-driven decisions with real-time business intelligence insights.
- Implemented A/B testing frameworks and statistical analysis procedures to measure campaign effectiveness and optimize marketing spend allocation, leading to 40% increase in ROI.
- Designed and executed data collection strategies, data cleaning processes, and feature engineering pipelines that improved model performance and reduced training time by 30%.
- Presented analytical findings and recommendations to C-level executives and board members, translating complex statistical concepts into clear business narratives and actionable insights.

Junior Data Analyst | Analytics Solutions Inc | Houston, TX | May 2017 - Jan 2019

- Performed comprehensive data analysis and statistical modeling for retail and e-commerce clients, focusing on customer behavior analysis, sales forecasting, and inventory optimization strategies.
- Developed automated reporting systems using SQL, Python, and R that reduced manual reporting time by 60% while increasing data accuracy and consistency across multiple business units.
- Conducted exploratory data analysis and created data quality assessments to identify trends, patterns, and anomalies in large datasets, supporting evidence-based business decision making.
- Collaborated with database administrators and IT teams to optimize data warehouse performance and implement efficient ETL processes for seamless data integration from multiple sources.
- Participated in client meetings and stakeholder presentations to communicate analytical findings and provide recommendations for business process improvements and strategic planning initiatives.

EDUCATION

Master of Science in Data Science | University of Texas at Austin | Austin, TX | 2017

GPA: 3.85/4.0

TECHNICAL SKILLS

Programming Languages: Python, R, SQL, Java, Scala, JavaScript, MATLAB

Machine Learning & AI: TensorFlow, PyTorch, scikit-learn, Keras, XGBoost, Random Forest

Data Tools & Platforms: Hadoop, Spark, AWS, Azure, Google Cloud, Tableau, Power BI

Databases & Storage: PostgreSQL, MongoDB, Cassandra, Redis, Snowflake, BigQuery

Statistical Analysis: Hypothesis Testing, Regression Analysis, Time Series, Bayesian Methods
