PROFESSIONAL SUMMARY

Senior Software Engineer with 8+ years of experience building scalable systems and leading high-performing teams. Expert in full-stack development, cloud architecture, and DevOps practices. Proven track record of delivering mission-critical applications, mentoring junior engineers, and driving technical excellence across organizations.

PROFESSIONAL EXPERIENCE

Senior Software Engineer | CloudScale Technologies

Feb 2022 - Present • San Francisco, CA

- Lead development of microservices architecture serving 10M+ daily users, improving system performance by 40% and reducing infrastructure costs by $2M annually.
- Architect and implement distributed systems using Kubernetes, Docker, and AWS, ensuring 99.9% uptime for mission-critical applications.
- Mentor team of 6 junior engineers, establishing code review standards and technical best practices that reduced bug reports by 35% and improved deployment velocity by 50%.
- Drive architectural decisions for scalable backend systems, implementing event-driven architecture that handles 1B+ daily transactions with sub-100ms latency.

Software Engineer | DataFlow Systems

May 2019 - Feb 2022 • San Francisco, CA

- Developed scalable data processing pipelines handling 500TB+ daily throughput using Python, Apache Spark, and Kafka, enabling real-time analytics for enterprise clients.
- Built RESTful APIs and GraphQL services used by 50+ internal applications, implementing authentication, rate limiting, and comprehensive monitoring solutions.
- Led migration from monolithic architecture to microservices, reducing deployment time from 2 hours to 15 minutes and improving system reliability.
- Collaborated with product managers and designers to deliver user-facing features for web and mobile applications, serving over 1M active users.
- Implemented automated testing frameworks achieving 95% code coverage and reducing production incidents by 60%.

Software Engineer | TechStart Inc

Jan 2017 - May 2019 • Palo Alto, CA

- Developed full-stack applications using React, Node.js, and PostgreSQL, delivering core product features that increased user engagement by 25%.
- Implemented automated testing frameworks and CI/CD pipelines, reducing manual testing time by 60% and achieving 95% code coverage across all modules.
- Optimized database queries and application performance, reducing page load times by 45% and improving overall user experience metrics.
- Contributed to open-source projects and maintained internal development tools used by 20+ engineers across the organization.

EDUCATION

Bachelor of Science in Computer Science | Stanford University | Stanford, CA | 2016

GPA: 3.8/4.0

EXPERT-LEVEL SKILLS

Programming Languages: Python, JavaScript, TypeScript, Java, Go, SQL, GraphQL

Frameworks & Libraries: React, Node.js, Django, FastAPI, Spring Boot, Express.js

Cloud & DevOps: AWS, Docker, Kubernetes, Terraform, CI/CD, Jenkins, GitHub Actions

Databases & Tools: PostgreSQL, MongoDB, Redis, Apache Kafka, Elasticsearch, Git

Leadership & Architecture: Technical Leadership, System Design, Code Review, Mentoring
