PROFESSIONAL SUMMARY

Results-driven Software Engineer with 5+ years of experience developing scalable web applications and leading cross-functional teams. Proven track record of delivering high-quality software solutions that improve user experience and business efficiency. Passionate about clean code, agile methodologies, and mentoring junior developers.

PROFESSIONAL EXPERIENCE

Senior Software Engineer

TechFlow Solutions *Feb 2022 - Present, San Francisco, CA*

- Lead development of microservices architecture serving 2+ million daily active users, ensuring 99.9% uptime and optimal performance across distributed systems.
- Architected and implemented RESTful APIs using Node.js and Express framework, resulting in 40% reduction in average response times and improved overall system efficiency.
- Mentored and supervised a team of 4 junior developers through comprehensive code reviews, pair programming sessions, and technical guidance, leading to 60% improvement in code quality metrics and development velocity.
- Designed and implemented automated CI/CD pipelines using Jenkins and Docker, reducing deployment time from 2 hours to 15 minutes while maintaining zero-downtime deployments.

Software Engineer

InnovateX Corp *May 2020 - Feb 2022, Palo Alto, CA*

- Developed and maintained enterprise-scale React-based web applications using TypeScript and Redux for state management, serving over 500,000 monthly active users across multiple business verticals.
- Built responsive and accessible user interfaces following modern design principles and WCAG guidelines, ensuring optimal user experience across desktop, tablet, and mobile platforms.
- Implemented comprehensive automated testing suites using Jest for unit testing and Cypress for end-to-end testing, achieving 95% code coverage and reducing production bugs by 70%.
- Optimized application performance through code splitting, lazy loading, and efficient state management patterns, resulting in 35% reduction in initial page load times and improved Core Web Vitals scores.
- Participated in architecture decisions and technical planning sessions, contributing to the migration from legacy jQuery codebase to modern React ecosystem while maintaining feature parity and user experience.

Junior Software Developer

StartupHub Technologies *Dec 2018 - May 2020, Mountain View, CA*

- Contributed to full-stack web application development using the MEAN stack (MongoDB, Express.js, Angular, Node.js), working on both client-side and server-side implementations for startup clients.
- Developed and maintained RESTful APIs and designed efficient database schemas for user authentication, data management, and business logic systems, supporting applications with 10,000+ registered users.
- Actively participated in agile development processes including daily standups, sprint planning, retrospectives, and story estimation sessions, contributing to consistent delivery of features within planned timelines.
- Assisted in deployment and monitoring of applications using AWS services including EC2, S3, and RDS, while implementing basic DevOps practices such as environment configuration and application logging.
- Collaborated with senior developers on code reviews and best practices implementation, gaining experience in Git workflows, testing methodologies, and software design patterns while contributing to codebase documentation and knowledge sharing initiatives.

EDUCATION

Bachelor of Science in Computer Science

University of California, Berkeley • Berkeley, CA • 2018

GPA: 3.8/4.0

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python, Java, C++, SQL

Frontend Technologies: React, Vue.js, Angular, HTML5, CSS3, Sass, Redux, Material-UI

Backend & Database: Node.js, Express, Django, PostgreSQL, MongoDB, Redis, GraphQL

DevOps & Tools: AWS, Docker, Kubernetes, Jenkins, Git, Webpack, Jira, Figma

Methodologies: Agile, Scrum, Test-Driven Development, CI/CD, Code Reviews
